

## **2008 ISRS/OC fellows**

**Suzanne Arnold** – The role of herbivory and productivity potential on reef resilience

**Michael Holcomb** – Coral calcification and environmental change: an investigation of interactions between temperature, CO<sub>2</sub>, nutrients, and symbiosis

**Kelton McMahon** – Tracking coral reef fish migration with compound specific-stable isotope analysis: connectivity between juvenile nursery habitats and coral reefs

**Malin Pinsky** – Effects of low population density on reef fish connectivity

**Hollie Putnam** – Larval response to forecast climate conditions

**Jada-Simone White** – Scaling up our understanding of mechanisms constraining coral recovery
